PROFESSIONAL SUMMARY

Backend developer with 4+ years of experience building Node.js and TypeScript services for AI app-building, construction, marketplace, and tax platforms. Led backend architecture and delivered REST APIs, microservices, data integrations, and production features using NestJS, PostgreSQL, MongoDB, and cloud services.

TECHNICAL SKILLS

Backend: Node.js (NodeJS), NestJS, Express.js, REST APIs, microservices, WebSockets
Frontend: React.js
Languages: TypeScript, JavaScript, SQL, Python
Databases & ORMs: PostgreSQL, MongoDB, Redis, Firebase, Supabase, TypeORM, Prisma, Mongoose
Cloud and messaging: AWS (EC2, Lambda, S3, CloudWatch), Azure, Docker, Kafka, RabbitMQ, BullMQ
Auth and APIs: JWT, OAuth 2.0, role-based access control (RBAC), Swagger/OpenAPI, Postman
DevOps and testing: GitHub Actions (CI/CD), Coolify, Vercel, Jest (unit and integration testing)
Engineering: API design, systems integration, caching, performance optimization, production troubleshooting, Git

PROFESSIONAL EXPERIENCE

Matlab Infotech | Backend Developer / Architect | Aug 2025 - Aug 2026

- **AppInvento:** Developed the backend for an AI-powered platform, currently under development, that builds and deploys full-stack web applications from natural-language prompts. Built REST APIs, queue management, payment gateway integration, and project hosting, among other core backend services.
- **MoveWork:** Built the backend for a contractor marketplace across Android, iOS, and web clients. Integrated Google sign-in, PayPlus payments, InforuMobile SMS, Firebase push notifications, and MongoDB. The Android app has 1,000+ downloads on Google Play. Website: ha-aver.com
- **Winchurch Services:** Built an AWS Lambda and PostgreSQL workflow that collects approximately 1,000 taxpayer records daily for a UK tax-rebate service and calculates overpaid or underpaid tax across multiple conditions.

Codeverse Weenggs Solutions LLP | Node.js Developer | Jan 2024 - Jul 2025

- **Contractor Foreman:** Developed and optimized NestJS backend capabilities for construction project management, including scheduling, financial tracking, and real-time updates, on a platform serving 60,000+ live users.

Samvartaka | Node.js Developer | Feb 2022 - Dec 2023

- **Virtual Budz Campaign Management:** Developed campaign scheduling, audience targeting, and product and inventory analytics for a cannabis retail platform with POS integrations.
- **Helloo One:** Built backend features for businesses to create and share digital cards with customers.
- **BIMX:** Developed backend capabilities for construction management, including 3D image handling and support for an integrated AutoCAD viewer.
- **Netabe:** Built document sharing and chat functionality with NestJS and Docker, including APIs for admin and user management.

EDUCATION

Diploma in Mechanical Engineering | STBS College of Diploma Engineering | 2013 - 2016
CGPA: 8.15
Node.js Training | Udemy (online course)
