SUMMARY

Backend-focused Node.js developer with experience architecting CRM systems, provider-agnostic integrations, and secure data-ingestion APIs. Passionate about continuous learning and staying current with emerging technologies, and committed to seeing every project through with precision until the desired outcome is achieved.

WORK EXPERIENCE

- Aug 2025 - Aug 2026 **Matlab Infotech**
Backend Developer / Architect
- Jan 2024 - Jul 2025 **Codeverse Weenggs Solutions LLP**
Node.JS Developer
- Feb 2020 - Dec 2023 **Samvartaka**
Node.JS Developer

EDUCATION

- Aug 2013 - Jun 2016 **STBS College of Diploma Engineering**
Mechanical Engineering - 8.15

PROJECT

Strikezone

Served as lead backend architect for Strikezone, designing a provider-agnostic CRM connector and core CRM capabilities — audience lists, dynamic segments, email campaigns, and marketing/sales email tools — plus calendar and Gmail inbox integrations. Built a secure ingestion API enabling third-party developers to securely ingest data and surface insights from it.

Contractor Foreman

Developed and optimized the Contractor Foreman website using NestJS, enhancing construction project management capabilities with seamless scheduling, financial tracking, real-time updates and much more.

Virtual Budz Campaign Management

Virtual Budz is a campaign management app for cannabis, marijuana, and medical industry.

Hello One

Hello.one is an app to generate and share cards digitally between clients and customers.

BIMX

Developed BIMX, a construction management platform with 3D image handling and integrated AutoCAD viewer, helping contractors visualize and manage project designs efficiently.

Netabe

Built document sharing and chat functionalities for Netabe using NestJS with Docker, including API development for both admin and user management.

SKILLS

Javascript	ExpressJS
Typescript	NestJS
NodeJS	Supabase
MongoDB	AWS
PostgreSQL	ReactJS (Beginner)
